

Two Minute Comprehensive Response to
CARDINAL HICKORY CREEK
Transmission Line Proposal

Cut and **P**aste the below text into the comment box at the PSC Comment Tool:

I am an electric customer of __name of any utility in Midwest US__ .

I oppose the Cardinal Hickory Creek expansion transmission line because of undue risks on my electric bill and Wisconsin lands, natural habitats and local economies.

I support PSC Staff's Base With Asset Renewal Alternative of rebuilding seven existing lines at a cost of less than \$1 million *instead* of the \$67 million expansion transmission line.

I urge that this Alternative be combined with Non-Transmission Alternatives because they provide very significant savings for Wisconsin electric customers and guarantee speedy CO2 reductions.

Energy Spending Priorities:

Energy reduction measures and projects I have already taken in my household include (list specifics like high efficiency appliances, lighting and equipment you have purchased, improvements to your dwelling, solar and other personal or community energy projects.)

Some energy related improvements I hope to make When Focus on Energy Rebates / Other Non-Transmission Alternative Opportunities are made available:
